<i>Papaver rhoeas</i>	Corn Poppy	Fife	12.0
<i>Triplospermum inodorum</i>	Mayweed	Angus	25.0
			100.0

### Seed Quality

The seed we produce is tested in the laboratory at Scotia Seeds. Our laboratory is audited annually by the Official Seed Testing Station for Scotland (OSTS), part of the Scottish Agricultural Science Agency.

The audit includes checking that the facilities, equipment and procedures for seed testing reach an acceptable standard and enable the laboratory to carry out seed tests in accordance with the International Seed Testing Association Rules for Seed Testing. The OSTS also performs checks on the accuracy of analysis by carrying out duplicate tests on a proportion of the samples we test.
